Experience the Art of Acupuncture

Traditional Chinese Medicine (TCM)

TCM theory developed and expanded mainly from practice and experience. As early as 4000 years ago, the ancient Chinese created primitive medicine in their struggle with nature and diseases. Acupuncture, Chinese herbal medicine and Chinese massage are both extremely important part of the therapies in TCM.

Acupuncture works by bringing into balance the body's life-energy fields, thereby allowing the body to heal naturally. Many studies in the animals and humans have demonstrated that acupuncture can cause multiple biological responses. These responses can occur locally or at a distance. This can lead to activation of pathways affecting various physiological systems in the brain as well as periphery.

At Happy Feet Acupuncture Healing Clinic, we specialize in treating a wide range of medical conditions by Acupuncture, Chinese herbal medicine and Chinese massage.
